

ANIKET PATOLE

Boston, MA | (617) 352-5273 | aniketpatole.works@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northeastern University – Boston, MA, USA

Master of Science - Information Systems | August 2023 – May 2025

Coursework: Data Science Methods, Big Data Systems & Analytics, Cloud Computing, Generative AI with LLMs.

University Of Pune - Pune, MH, India

Bachelor of Engineering - Computer Engineering | August 2017 – May 2021

EXPERIENCE

Northeastern University – Boston, MA, USA

Data Analyst - Admissions Assistant | September 2024 – April 2025

- Automated applicant tracking in **Salesforce CRM** using **SQL**-driven pipelines, reducing manual entry by 40% & improving accuracy.
- Created business-focused Tableau dashboards and self-service reports to support pricing, admissions, and profitability teams.
- Validated CRM-to-Tableau syncs & historical data pipelines for accuracy & consistency, supporting admissions data quality.

Accenture - Logistics & Parcel Services – Pune, MH, India

Data Engineer | August 2021 – July 2023

- Architected & managed **ETL** pipelines for parcel tracking, **delivery SLAs**, return logistics, processing **1M+** records weekly.
- Led a team of 5 to extract actionable user activity and transaction records using complex Teradata SQL joins across 10+ tables, supporting law enforcement investigations into malicious logistics activities.
- Embedded 100+ Master Data syncs as part of data governance frameworks to support compliance & audit-readiness for logistics.
- Collaborated with UK-based cross-functional teams in biweekly Agile Scrum environment and incident calls to restore service during SLA breaches, optimizing data integration workflows and improving processing efficiency by 25%.
- Optimized SQL queries in IBM DataStage to process **1.5TB of data**, improving performance, scalability & system reliability.
- Supervised workflows authoring 10+ alerting scripts in Shell scripting used for data pipelines and monitoring workflows.

SKILLS

Languages: Python, SQL, R, JavaScript

Databases: PostgreSQL, Snowflake, MS SQL Server, Teradata, Oracle, IBM DB2, NoSQL (MongoDB, DynamoDB)

Cloud Platforms: AWS (S3, Redshift, Lambda, EC2, Glue, Vertica), GCP, Azure, Kubernetes

ETL & Data Engineering: Talend, Databricks, IBM DataStage, AWS Glue, Airflow (DAG-based workflows), dbt

BI/Visualization: Tableau, Power BI, Excel (VLOOKUP, Pivot Tables), Qlik

DevOps & Tools: Git, GitHub Actions, Docker, CI/CD, Jira, Confluence, Bash

Big Data & Data Processing Technologies: Apache Spark, Hadoop, HDFS, Apache Kafka, YARN

Data Orchestration & Modeling: Dimensional Modeling, Data Modeling & Optimization

Data Security: AWS IAM, S3 Encryption

PROJECTS

Paddock Pal: F1 Regulation Assistant | *Multi-Agent, Pinecone, Streamlit, AWS EC2, Semantic Search, Airflow, FastAPI, RDS*

- Devised a multi-agent assistant for F1 regulations using **Pinecone** and **Streamlit**, enabling semantic keyword querying.
- Deployed** scalable data apps on AWS EC2 using Streamlit/FastAPI with secure Snowflake and RDS integration.
- Systematized data scraping from Wikipedia, FIA via Airflow, embedding data into **Pinecone** for semantic search, retrieval.

Multi-modal Document-Based Q&A System | *RAG, Langgraph, AWS IAM, S3, Streamlit, FastAPI, EC2, Financial Regulations*

- Developed a robust multi-agent Retrieval-Augmented Generation (RAG) system using Langgraph to scrape CFA PDFs, integrating Pinecone vector database for efficient semantic retrieval and precise querying of financial regulation documents.
- Implemented AWS IAM-based access control for data pipelines, enforced S3 document encryption and data security policies.
- Deployed Streamlit & FastAPI on EC2, enabling friendly UI, export findings into PDF reports and Codelabs documentation.

Hospital Management System – Analytics Dashboard | *Power BI, SQL, DAX, KPIs, Data Modeling, Healthcare Analytics*

- Developed an end-to-end **Power BI dashboard** analyzing data from **50+ doctors, 50 patients, and 15+ departments**.
- Automated Power BI dashboard pipelines, implemented DAX measures for dynamic KPIs, reducing manual tracking by 60%.
- Created SQL-based data models to manage **500+ patient interactions**, improving data access and reporting efficiency by **40%**.

End-to-End ELT Pipeline | *Docker, PostgreSQL, ELT, dbt, Airflow DAGs, Cron Jobs, CTE, Automation, Containerization*

- Developed a Dockerized **ELT pipeline** automating PostgreSQL data transfers using **pg_dump** and **psql** with robust error handling.
- Scheduled and managed pipeline workflows dynamically with **Airflow DAGs** and **cron jobs** in a containerized environment.
- Utilized **dbt macros** and **Common Table Expressions (CTEs)** transforming relational data into analytical models like film_ratings.
